Introduction:

This document is a guide detailing the procedures for testing and verifying the performance of the application on different devices and scenarios. It includes a list of features to test, such as navigation, performance, and functionality of different screens. It also describes the steps to reproduce possible problems and how to report test results. This document is vital to ensure that the app works properly and provides an optimal experience for users.

Apps Description:

Lit App is an application that helps businesses and influencers connect to work in advertising campaigns on social networks. Businesses publish their job offers and influencers access these offers, being able to filter by category and when choosing one, they must complete it as specified in the description of the offer. The influencer will show up at the business at the established time, comply with the publication of content, and mark the offer as complete; then the business can accept or reject the job as it decides if it has complied with what has been established. Both for a merchant to publish an offer and for the influencer to accept it, a system of credits is used, which are accessed through membership, in the case of the merchant, and are renewed based on the number of followers, in the case of the influencer.

Objectives: some of the objectives are as follows

- Check that all functions of the app are working properly.
- Fix any problems or bugs.
- Make the app easy to use.
- Make sure it works on different types of phones.
- Make the app fast.
- Keep users' data safe.
- Listen to users and make changes based on what they say.

Scope: Ensure that the app runs smoothly and is easy for users to use.

Audience: Aimed at influencers and businesses interested in collaborations and content management.

Applications Screenshots:

This section presents screenshots of the Lit Influencers app, which will help to get familiar with the interface and its functionalities.

Screenshots 60 to 65: Create Offer(Business).

Organization:

The screenshots are presented in sequential order, showing different screens and features of the application.

Below are the screenshots of the application.

Lit Influencer Screenshots:

Screenshot 1: Home - Login and Registration Options:

The screenshot shows the home page of the Lit Influencers application which presents users with two options: login or sign up, which serves as a starting point for users to choose which action to take.

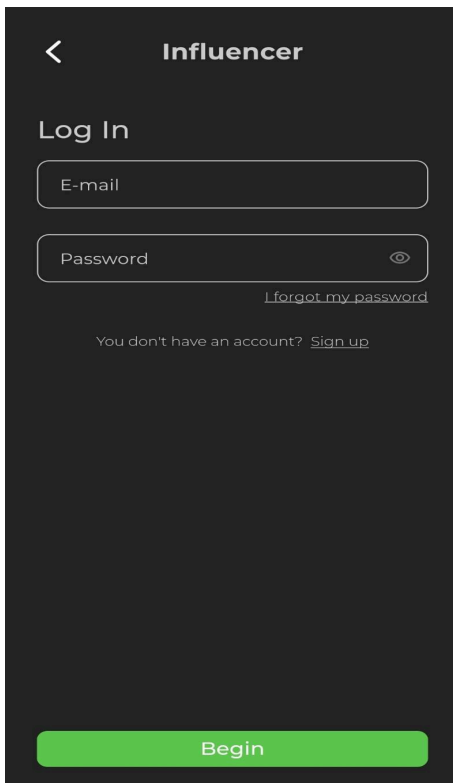

- Login option: this option allows users who already have an account to access the application, by clicking on the button users will be redirected to the login form (Screenshot: Login Form) where they will enter their login details and credentials.
- Sign-up option: this option invites users who do not have an account to register with the application, by selecting this option they will be redirected to the registration form (Screenshot: Registration Form).

This screen allows users to choose between logging in or registering depending on their specific needs!

Screenshot 2: Login Form:

In the login form, users are asked to enter their credentials to access their accounts.

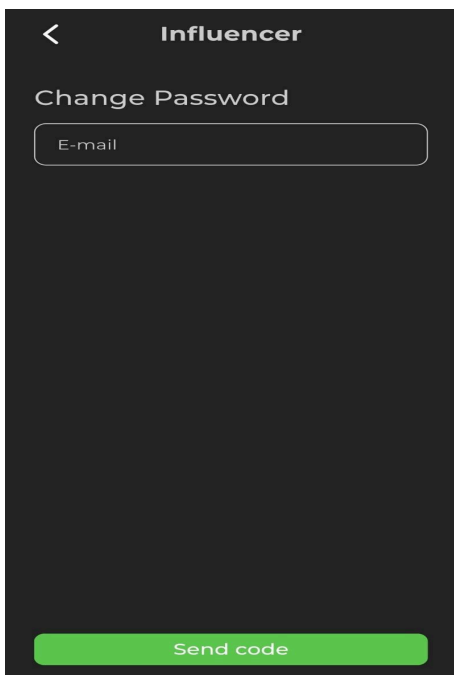

The screenshot shows a mobile app interface for logging in. At the top, there is a back arrow and the word "Influencer". Below that, the text "Log In" is displayed. There are two input fields: "E-mail" and "Password". The "Password" field has a toggle icon (an eye) to the right. Below the "Password" field, there is a link that says "I forgot my password". At the bottom of the form, there is a link that says "You don't have an account? Sign up". At the very bottom of the screen, there is a large green button labeled "Begin".

- Email: Users must enter the email address associated with their account.
- Password: users must enter the password associated with the account.
- Begin button: once the credentials are entered, users can click on the button to submit the form and access their accounts.

The interface has a clean and easy-to-understand design.

Screenshot 3: Recover Password:

The screenshot shows a mobile app interface for recovering a password. At the top, there is a back arrow and the word "Influencer". Below that, the text "Change Password" is displayed. There is one input field labeled "E-mail". At the bottom of the screen, there is a large green button labeled "Send code".

The interface has a clean and easy-to-understand design.

If a user forgets their password, they enter their email address, and a reset code is sent to them.

Home Offers Support Account

Screenshot 19: My Offers.

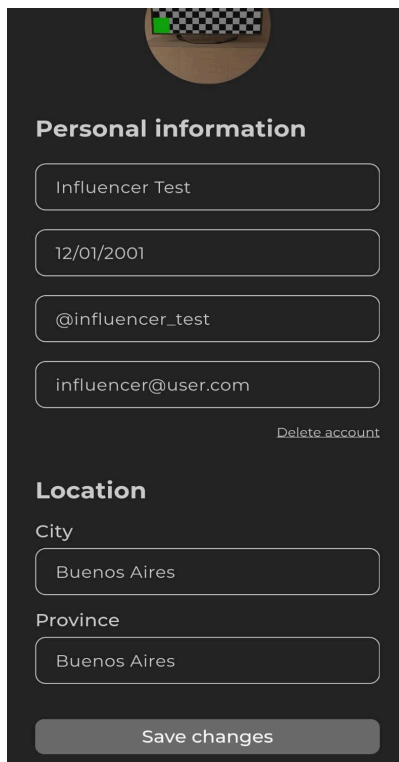

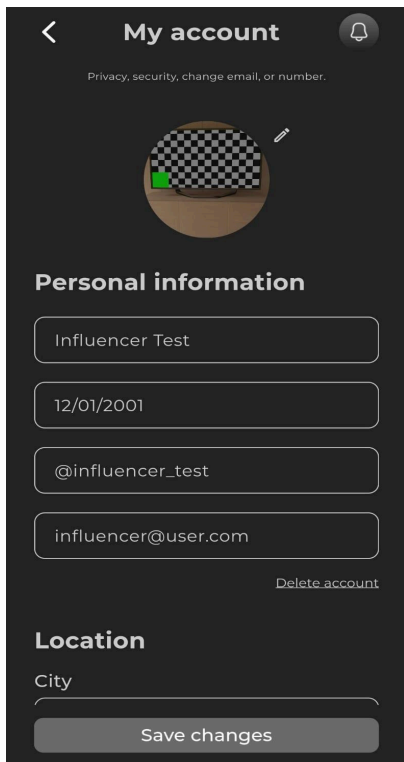

In this section, the user can see the offers that he/she has associated.

Screenshots 20 to 23: Support

This section provides access to technical support to resolve problems or concerns.

Screenshots 24 to 28: My Account

It allows users to access and manage their profiles, as well as to modify their data and delete their accounts.

Screenshot 29: Settings

The "Settings" section provides users with the ability to customize and adjust the [Application Name] application according to their individual preferences. Here, users can modify settings such as their data or other settings related to the user experience. This is the place where users can tailor the application to best suit their needs and preferences.

Lit Business Screenshots:

Screenshot 30: Home - Login and Registration Options:

The screenshot shows the home page of the Lit Business application which presents users with two options: login or sign up, which serves as a starting point for users to choose which action to take.

- Login option: this option allows users who already have an account to access the application, by clicking on the button users will be redirected to the login form (Screenshot: Login Form) where they will enter their login details and credentials.
- Sign-up option: this option invites users who do not have an account to register with the application, by selecting this option they will be redirected to the registration form (Screenshot: Registration Form).

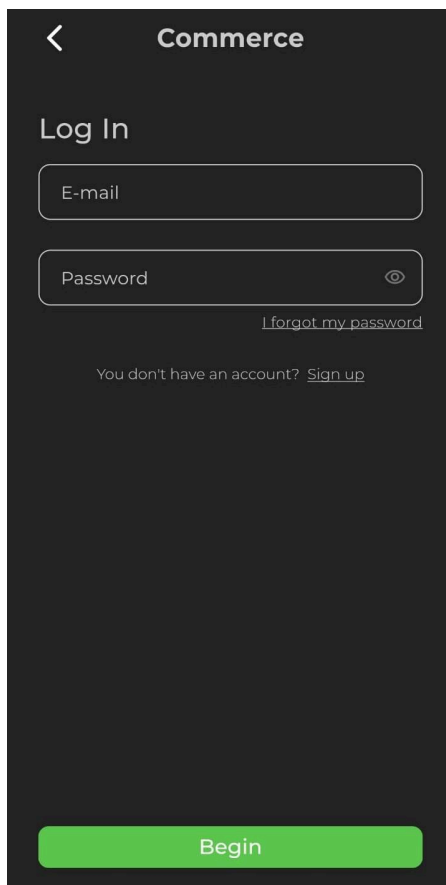

This screen allows users to choose between logging in or registering depending on their specific needs!

Screenshot 31: Login Form:

In the login form, users are asked to enter their credentials to access their accounts.

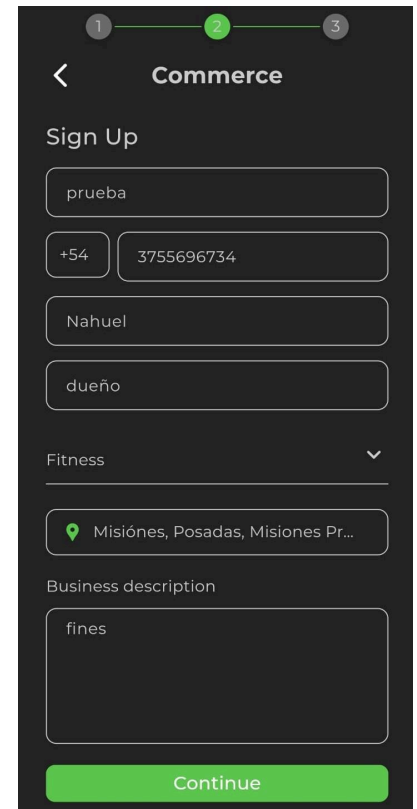

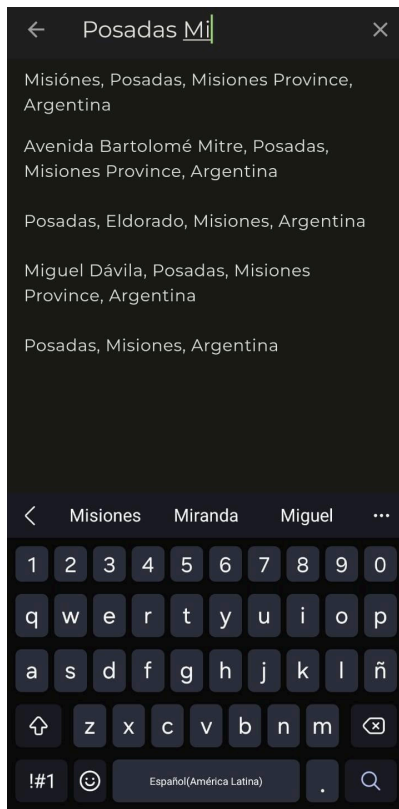

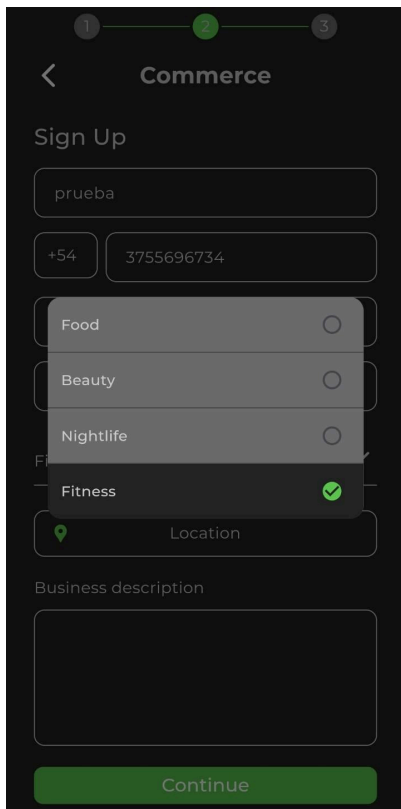

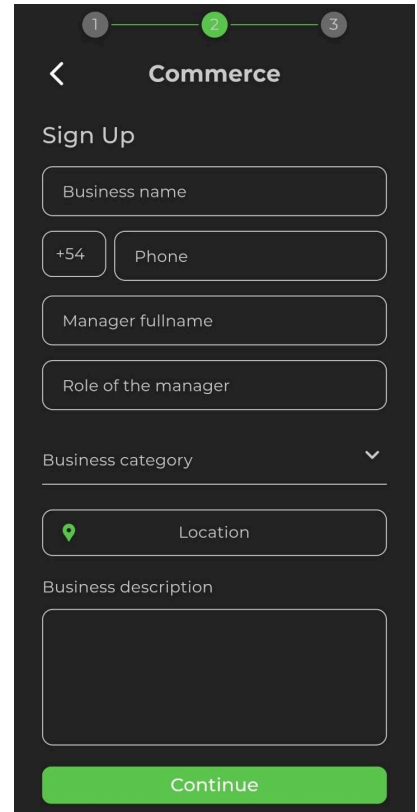

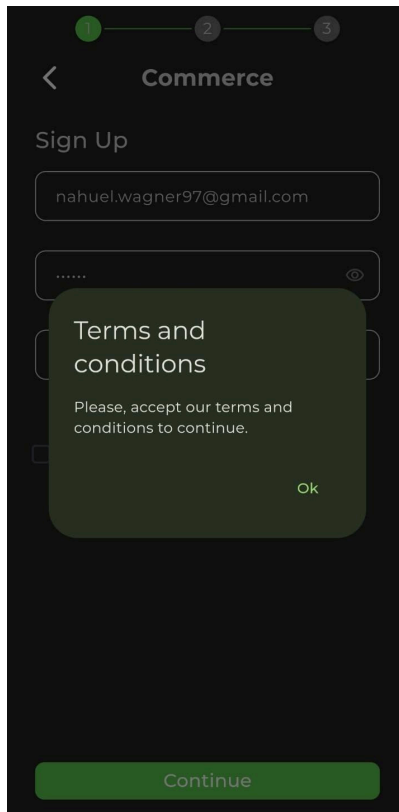

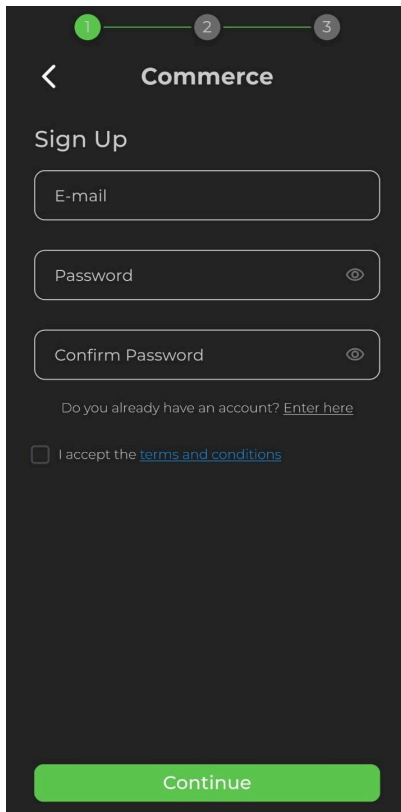

- Email: Users must enter the email address associated with their account.
- Password: users must enter the password associated with the account.
- Begin button: once the credentials are entered, users can click on the button to submit the form and access their accounts.

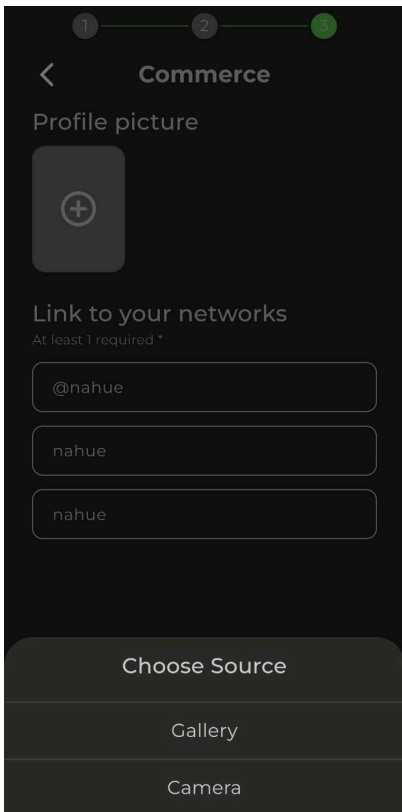

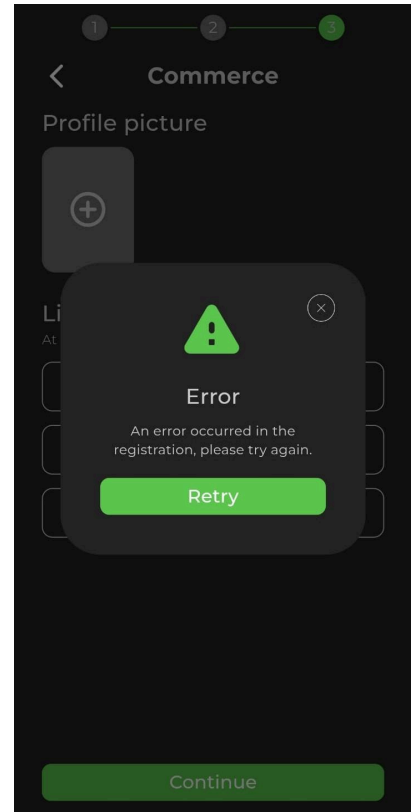

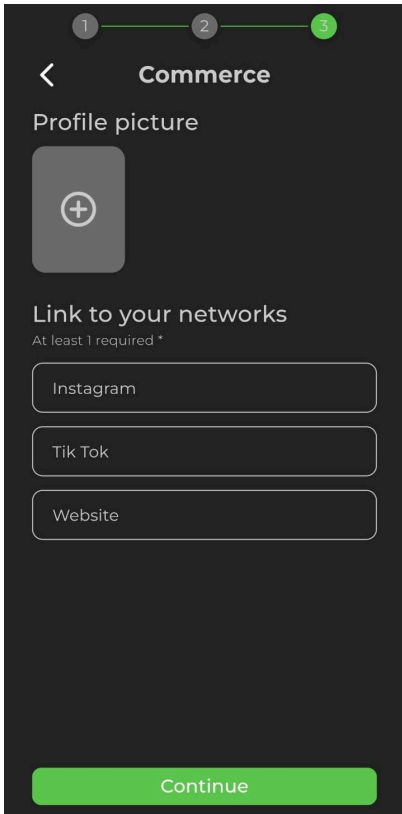

The interface has a clean and easy-to-understand design.

The screenshot shows a mobile application interface for a login form. At the top, there is a back arrow and the word "Commerce". Below this, the text "Log In" is displayed. There are two input fields: "E-mail" and "Password". The "Password" field has a toggle icon (an eye) to the right of it. Below the "Password" field, there is a link that says "I forgot my password". At the bottom of the form, there is a link that says "You don't have an account? Sign up". At the very bottom of the screen, there is a large green button with the text "Begin".

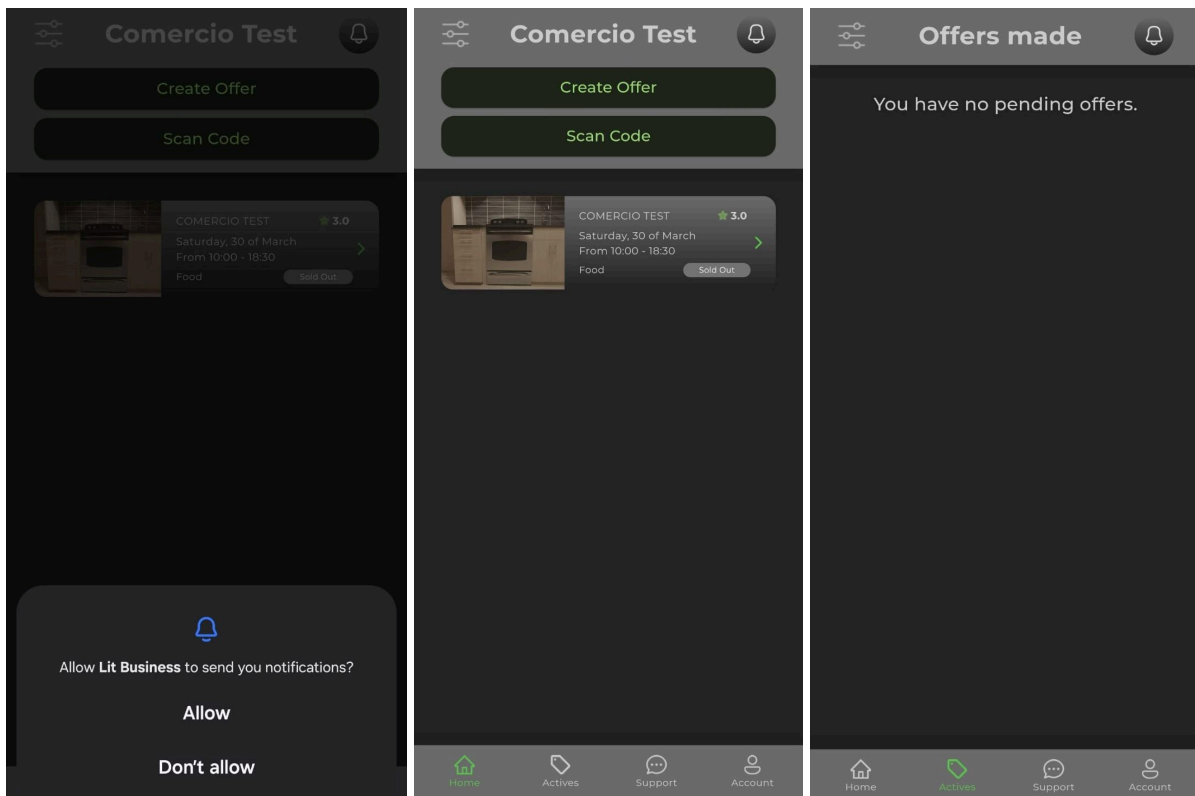

Screenshots 32 to 41: Home - Registration Form:

This form asks users for the necessary information to be able to set up a new account and to be able to access all the application's functionalities. This form is designed clearly and simply to facilitate the registration process for new users.

Screenshots 42 to 44: Home section.

The Home section, which offers users several options to explore and access different areas and functions of the application, serves as a central point from which users can start their experience and navigate to other parts of the application quickly and easily.

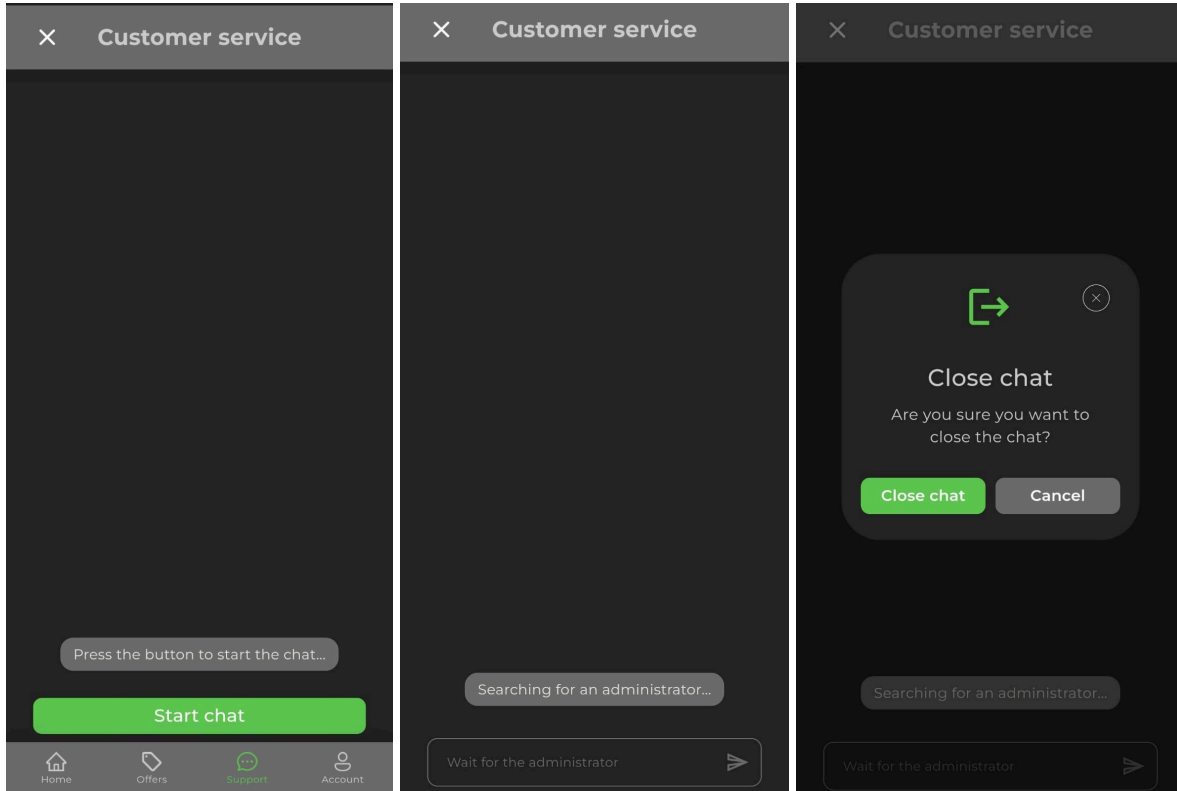

The navigation options available in the section are:

- Home: Main section of the application.
- Actives: Section where users can consult their offers.
- Support: provides access to technical support to resolve problems or queries.
- Account: Allows the user to access and manage their profile.
- Create Offer: The section is where the user can create new offers.
- Scan Code: This section in which the user can scan QR codes.
- Notifications: This section is where users can view their notifications.

Screenshot 45: Section Actives

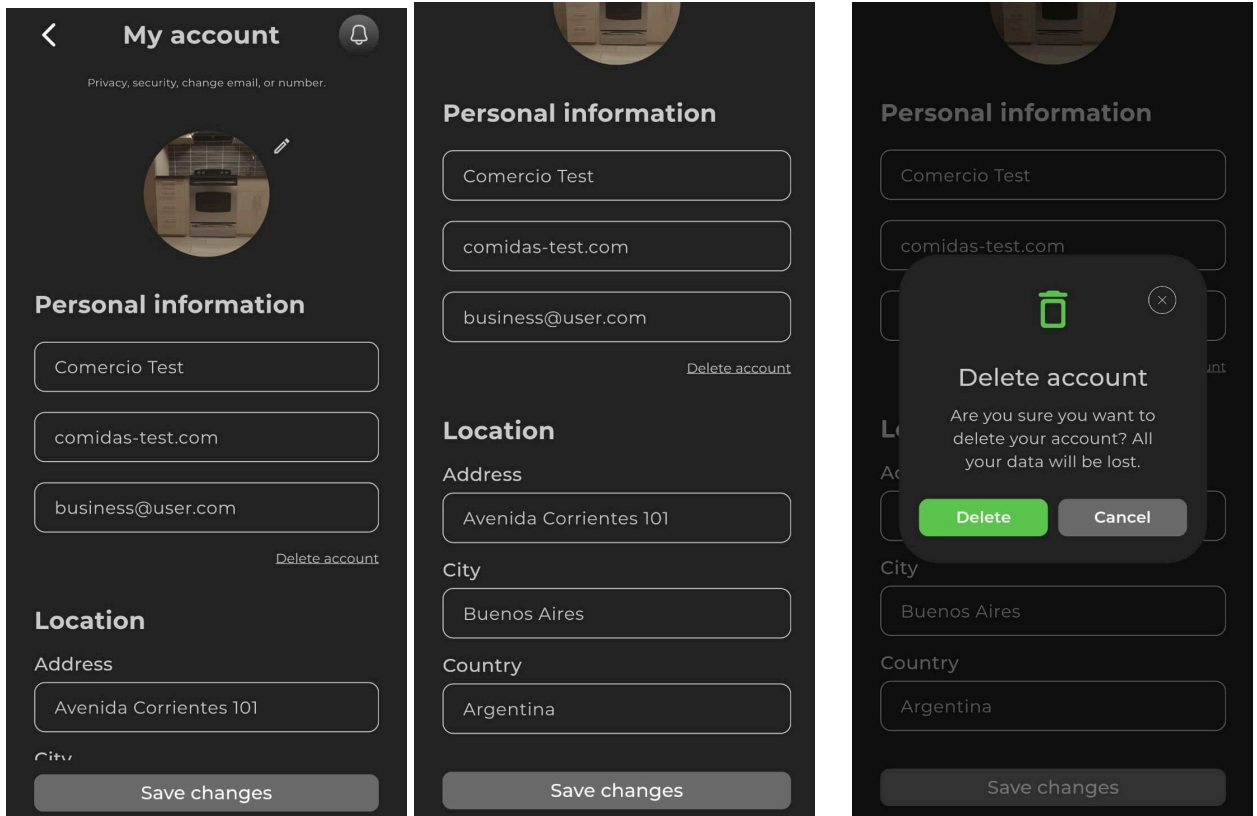

Screenshots 46 to 48: Support

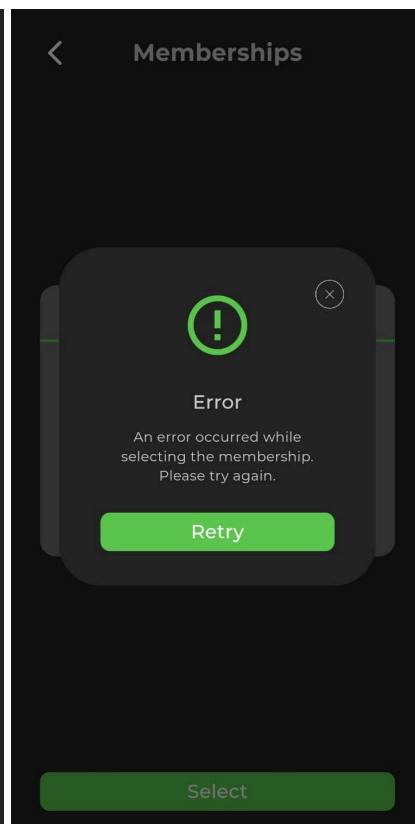

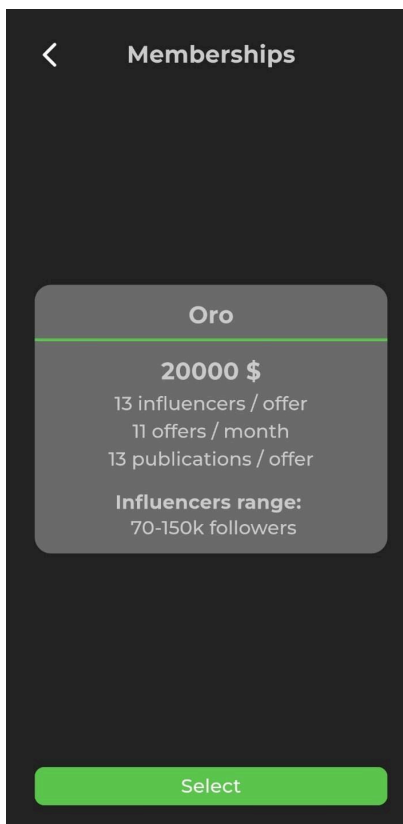

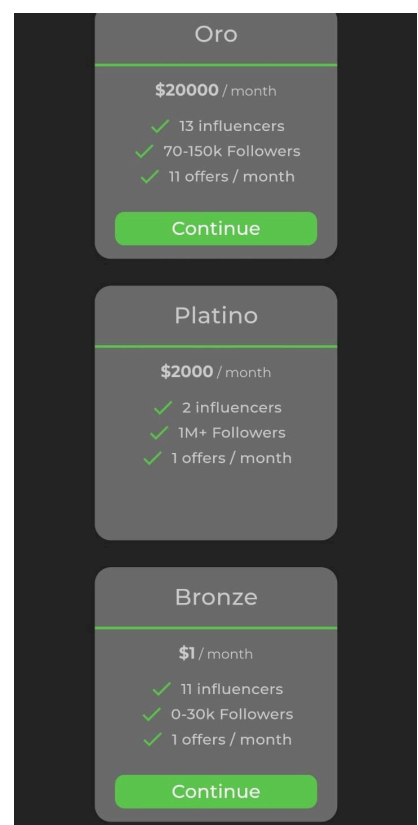

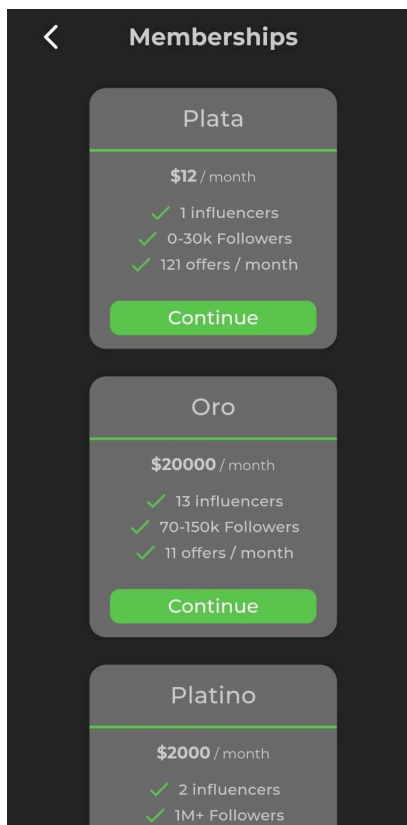

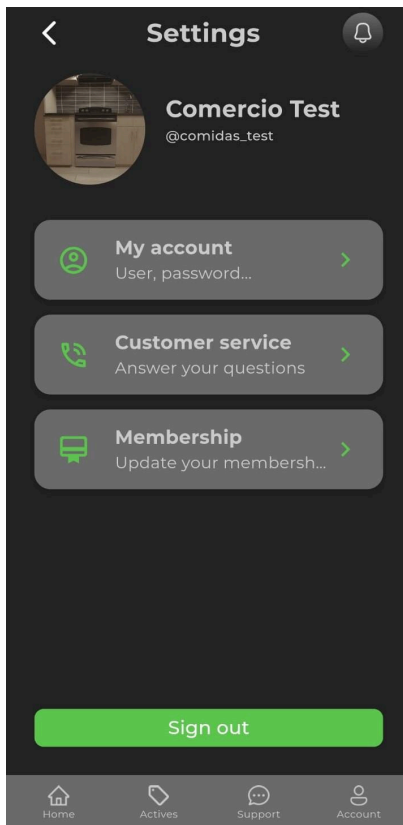

This section provides access to technical support to resolve problems or concerns.

Screenshots 49 to 51: My Account.

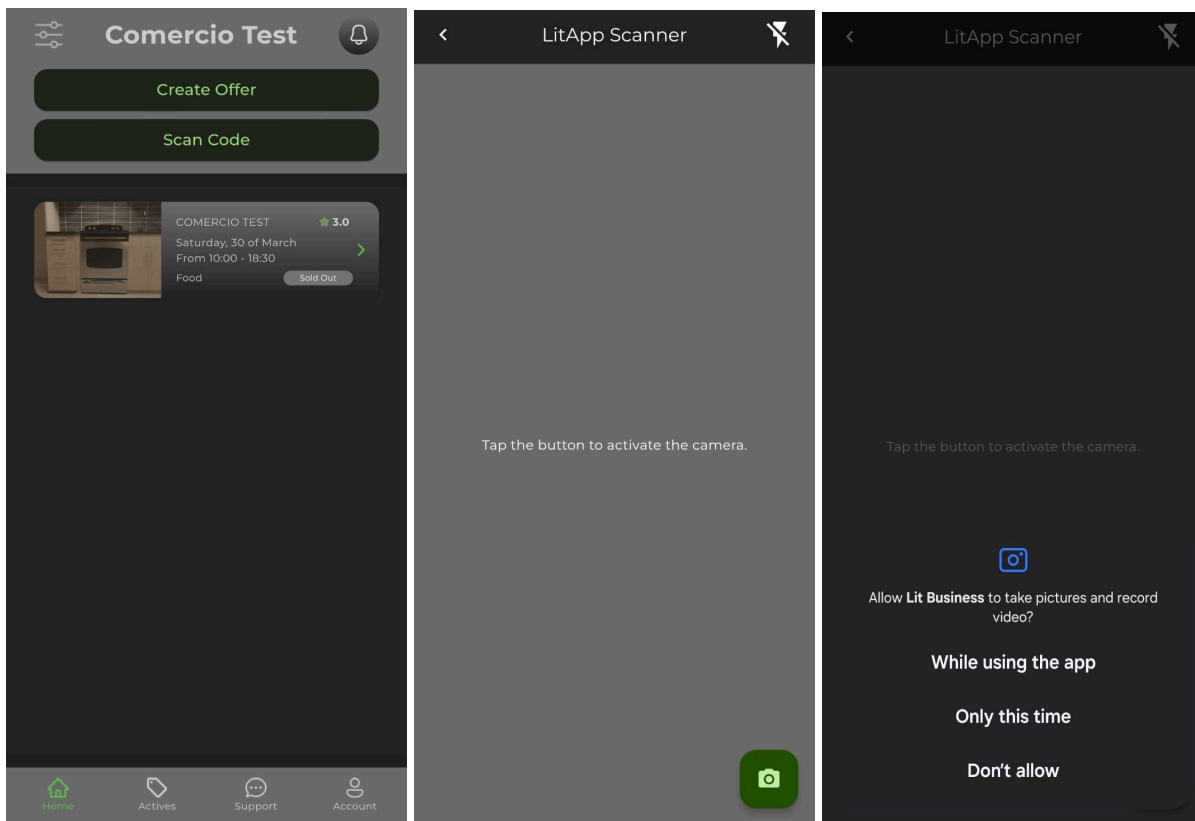

It allows users to access and manage their profiles, as well as to modify their data and delete their accounts.

Screenshots 52 to 56: Settings

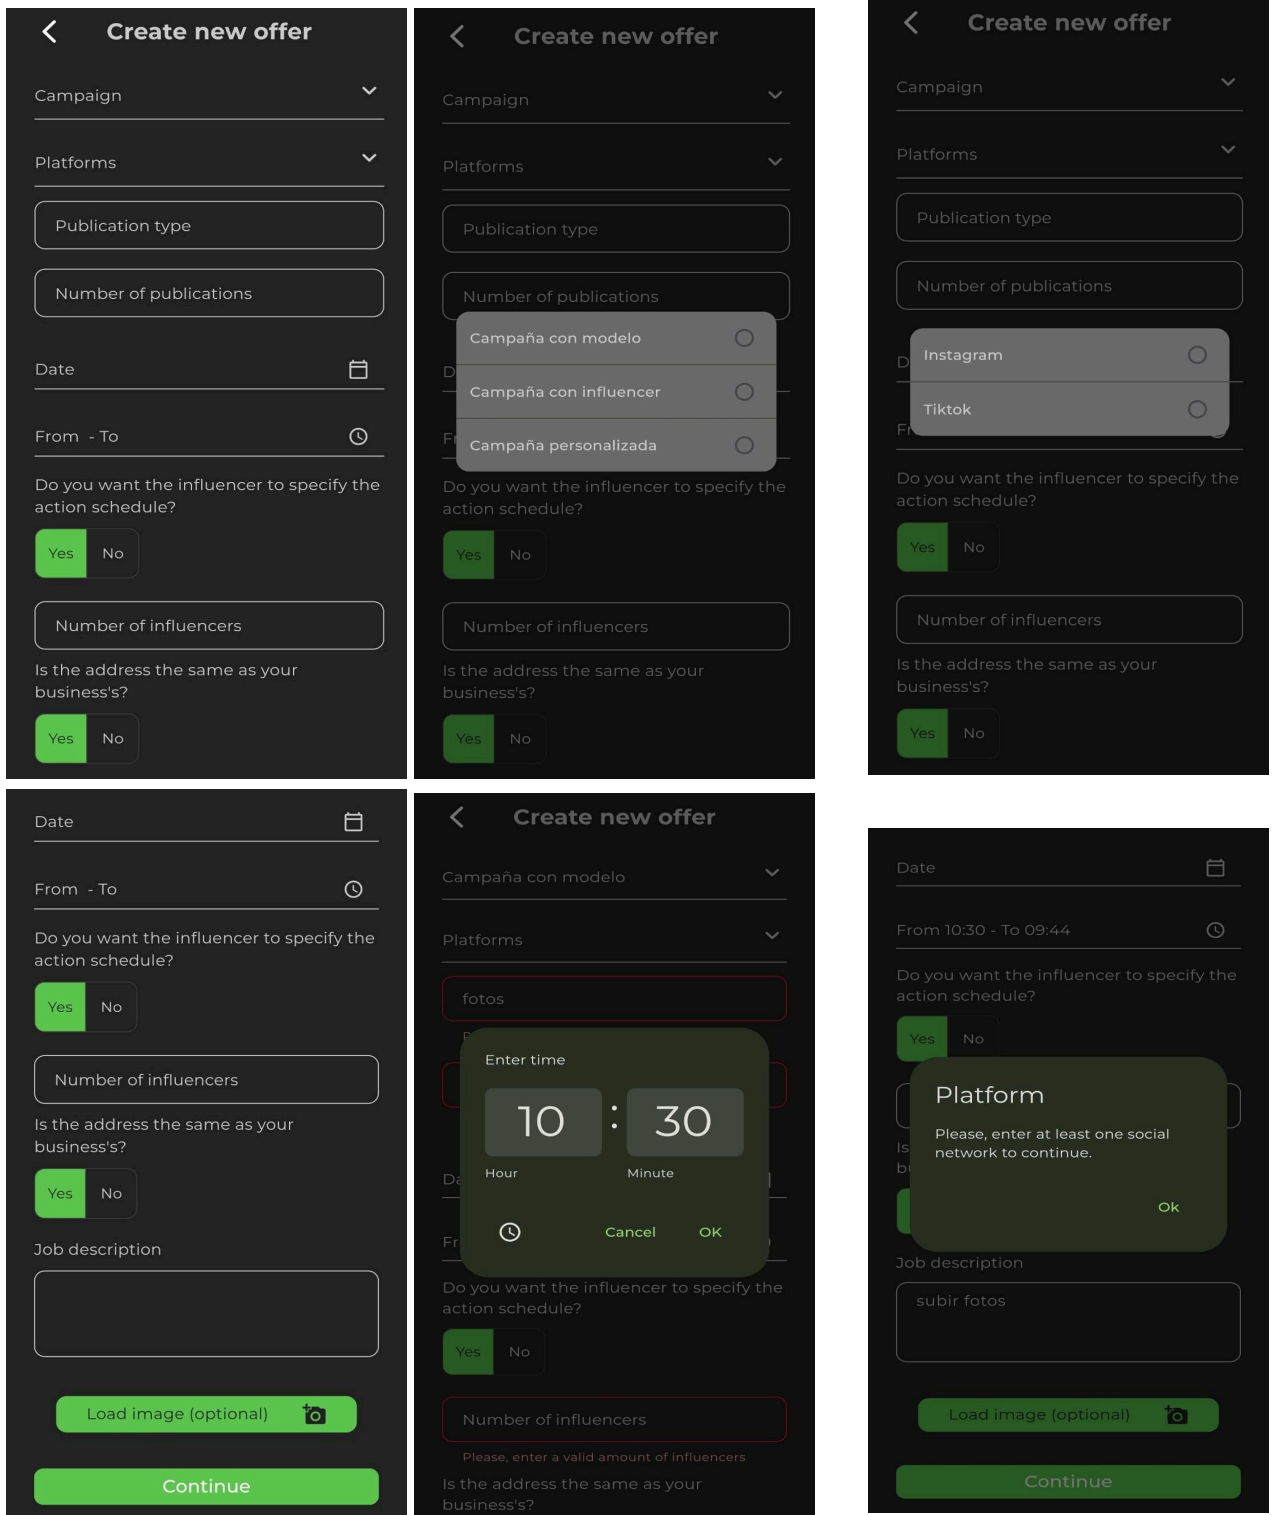

Screenshots 57 to 59: Scan Code.

This QR code section, when scanned, allows users to quickly access the information provided without the need for manual data entry.

Screenshots 60 to 65: Create Offer.

"The offer registration section is where users can create and manage special promotions for their products or services within the application. It allows users to define details such as the type of offer (discount, gift, etc.), the validity period, and specific conditions. Once created, the offer is displayed for customers to see and benefit from when making a purchase."
